📍 Bangkok, Thailand | Relocating to Mumbai

Personal Summary

Data Engineering Leader with 13 years of experience designing and scaling enterprise data platforms across banking, payments, insurance, telecom, and retail domains. Proven track record of leading high-performing engineering teams and delivering large-scale analytics, fraud, reconciliation, and reporting solutions using Snowflake, Kafka, Spark, dbt, AWS, and Azure. Experienced in modern data architecture, data modeling, cloud migration, CI/CD, data governance, and stakeholder management. Leveraging GenAI tools to accelerate engineering productivity, solution design, and delivery. Passionate about driving engineering excellence, business impact, and innovation through data.

Professional Experience

Staff Data Engineer - Coda Payments

Bangkok, Thailand | May 2025 – Present

- Designed and implemented real-time Kafka consumers powering critical Fraud and Reconciliation services, integrating with a centralized Real-Time Messaging Platform (RMP) for high-throughput, low-latency processing.
- Led migration of ingestion pipelines from AWS Kinesis/SQS to Kafka, validating near 100% message parity through Grafana and Streamlit-based monitoring and ensuring zero data loss during transition.
- Modernized the data lake architecture by migrating from a traditional S3-based lake to Apache Iceberg tables with dbt-driven transformations, enabling scalable and governed Gold-layer datasets.
- Implemented Infrastructure-as-Code and CI/CD automation using Terraform, Atlantis, and AWS CodePipeline, improving deployment reliability and governance.
- Optimized Athena, QuickSight, and S3 workloads through query tuning and storage optimization, reducing cloud costs by 20% while improving platform scalability and performance.

Technical Lead (Consultant) - TO THE NEW

Mumbai, India | Apr 2024 – Oct 2024

- Optimized large-scale batch pipelines for a financial client, reducing execution time from **8+ hours to under 1 hour** and achieving a **20% reduction** in processing costs.
- Led the design and migration to AWS EMR Serverless architecture, significantly improving infrastructure scalability while lowering operational overhead.
- Built an AWS data warehousing POC integrating MongoDB via DMS, Glue, and Airflow, enabling advanced analytics through Redshift and QuickSight.

Technical Lead - TO THE NEW

Mumbai, India | Oct 2022 – Feb 2024

- Led and mentored a high-performance team of **8 data engineers** to re-architect a legacy SAS analytics platform to a modern Snowflake + dbt stack, ensuring best-in-class architectural standards.
- Collaborated with business stakeholders, architects, and delivery leadership to define data strategy, roadmap, and execution plans across multiple workstreams.
- Delivered 120+ financial, operational, and analytical reports and dashboards by designing modular, version-controlled transformations and enterprise-scale data models to ensure data consistency.

Senior Data Engineer - Luxoft

Warsaw, Poland | Nov 2021 – Jul 2022

- Engineered scalable Azure data solutions using ADF, Databricks, and Synapse to deliver a reusable analytical data layer for retail teams across Central and Southern Europe.
- Empowered data science workflows and Power BI insights by optimizing cross-country data delivery and mentoring engineers on Azure data engineering best practices.

Senior Data Engineer - Fractal Analytics

Mumbai, India | Mar 2021 – Oct 2021

- Developed end-to-end event-driven big data pipelines on AWS using EMR, Spark, Kudu, and Lambda to power supply-chain analytics and Tableau reporting, significantly improving operational productivity.

Senior Data Engineer (BIU) - Axis Bank

Mumbai, India | Mar 2019 – Feb 2021

- Delivered batch and real-time big data solutions for Fraud, Customer Analytics and Digital Banking using Spark Streaming, Kafka, Hive and PySpark, eventually saving **INR 5.5Mn in 6 months**.

- Managed and mentored a team of **4 Data Engineers**, providing technical guidance, code reviews, and delivery ownership for critical banking analytics pipelines.
- Collaborated with business stakeholders to translate complex requirements into scalable data solutions, ensuring 99.9% pipeline uptime.

Senior Data Engineer (R&D) - Flytxt

Mumbai, India | Jul 2017 – Mar 2019

- Delivered analytics and ML-driven big data solutions for 35+ telecom clients using Cloudera and Hortonworks platforms while collaborating with Product, R&D, and Analytics teams.

Associate Technical Consultant - Think Big Analytics (Teradata)

Mumbai, India | Feb 2017 – Jun 2017

- Managed and optimized Hadoop ecosystems on CDH, troubleshooting complex Spark/cluster-level issues and automating data validation workflows via Hive, Shell scripting, and Tableau.

Data Engineer - Aureus Analytics

Mumbai, India | Feb 2016 – Jan 2017

- Developed banking data pipelines on Hortonworks using Hive, Pig, Sqoop, Oozie, Ambari, HBase, Phoenix, and Drill.

Systems Engineer - TCS

Mumbai, India | Dec 2012 – Nov 2015

- Migrated enterprise workloads from Oracle to Hadoop, handling TB-scale datasets and building transformations using Hive, Pig, Sqoop, and Java UDFs.
- Earlier experience as PL/SQL Developer focused on performance tuning and production support.

Technical Skills

DATA ENGINEERING: Kafka, Spark, Spark Streaming, Snowflake, dbt, Apache Airflow, Apache Iceberg, Hadoop, Hive, Impala, MongoDB

CLOUD & DATA PLATFORMS: AWS (EMR, Glue, Athena, Redshift, S3, Lambda, QuickSight), Azure (ADF, Databricks, Synapse, Delta Lake), Terraform

DATA ARCHITECTURE: Data Warehousing, Data Lakes, Lakehouse Architecture, Data Modeling, ETL, ELT, Data Governance

PROGRAMMING: Python, PySpark, SQL, Java, PL/SQL

ENGINEERING PRACTICES: Git, Bitbucket, GitHub, Jira, Agile (Scrum/Kanban), CI/CD, Code Reviews, SDLC

AI & PRODUCTIVITY TOOLS: Cursor, ChatGPT, Claude, Gemini, AI-assisted Development, Automated Documentation

Certifications & Content Creation

- **Positive ACS Skills Assessment** – Data Engineer / Software Engineer (Australia).
- **SnowPro Core Certified** – Snowflake.
- **Content Creation:** Instructor for [Data Engineering with Hadoop and Spark](#).
- **Big Data Engineering with Hadoop and Spark** – IIT Roorkee.

Education

Bachelor of Engineering (Electronics) — University of Mumbai (Graduated: May 2012)

Honors & Awards

- Multiple organizational awards including Impact Award, BIU Star Award, Star Performer, Star of the Month/Quarter, and On-the-Spot Awards for technical excellence and business impact.
